

# Which novel pseudowords does the LTM-only route reproduce exactly? (391 items, 4 seeds)

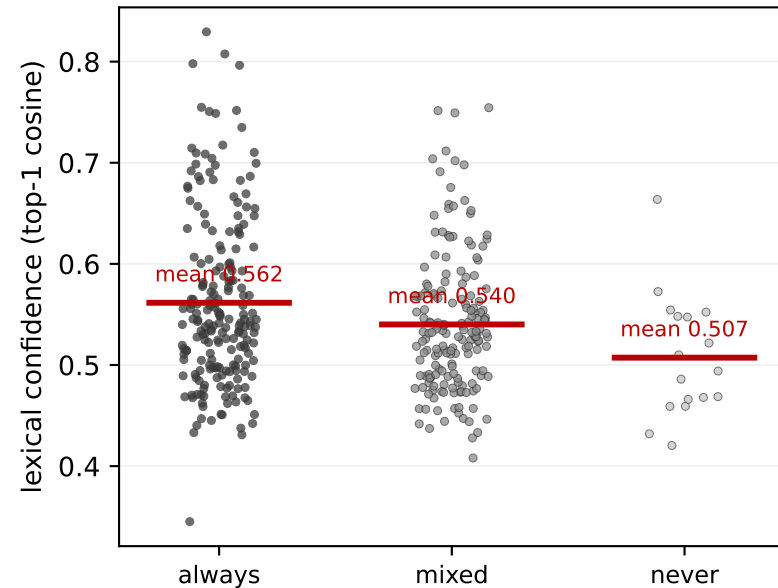

## A LTM exact-match success across seeds

## B Target length by success group

## C Lexical confidence by success group

gate = sigmoid( $2.0 \times (\text{lexical\_confidence} - 0.7)$ ) is a monotone function of this variable, so it is reported as auxiliary and never as independent evidence
